Experience: Academic Projects

QR-Based Restaurant Management System

- Developed a full-stack web application that replaced the traditional restaurant ordering process with a QR-code-based digital ordering system.
- Applied concepts from Web Development and Introduction to Marketing courses.
- Focused on improving customer convenience and operational efficiency.
- Secured 3rd Position in the university project competition.

Multi-Function Calculator Application

- Designed and developed a calculator application with a graphical user interface (GUI).
- Implemented multiple calculation features using Java Object-Oriented Programming (OOP) principles.

HTML Learning Notes Website

- Created a beginner-friendly HTML notes website using pure HTML language.
- Covered HTML concepts from basic to advanced levels.
- Designed to help newlearners understand web development fundamentals through practical examples.
